Certainly, Hayes, I'll be interested to hear about the current problem and how you solve it. We have had a tragic situation on the property.

Let me know your plans, Harley

Harley, we will not be able to make it there tomorrow we have serious situation here. Tell you more about it later

Sorry

Hays

Excellent, Hayes. Ring me before you make the turn-off (cell service) or come by the house first. I'll see if I can get Dave Foley over. See you Friday, Harley

Harley, Matt and I would like to come over early Friday morning and look at the bridge site. If your surveyor could meet us that would be great. If he can not maybe he can get over and mark the corners sometime before we get there.

I am thinking we will be there between 8:00 and 9:00am

Hello Hayes, and welcome back to this corner. I will be in the big sin-city of Grand Junction Wednesday and Thursday of this week and hope these are not the days you might come over the mountain. When you do come, I will see if Dave Foley, our surveyor will mark the exact spot for us.

My best, Harley

Summer is going very well.

I agree with your idea but the pot will not have any money in it until September 7th and then the paper work will need to be done and approved to spend it.

I am in silverton right now and may be able to get over your way to check out bridge location per your map.

I will let you know if I can get away.

Hi Hayes. I hope your summer is going well and that you have some sunshine. The summer here has been full of rain and Ophir is magnificent. The Howard Fork is finally back in its course which makes me suggest tthat the spring will a difficult time to put in the bridge when the water is high. It would make sense to reach into the pot and get the bridge in this fall. What do you think?

My best, Harley
